

Global Admins MFA Audit

Generated at — July 20, 2026, 1:50 p.m.

There are two methods of enforcing MFA

- Per-user MFA
- Conditional Access

1 MFA Type

Answers

☐ Per User	2
☐ Conditional Access	3

2 Per-user

- [Per user MFA link](#)
- Active Users > Multi-factor Authentication

Microsoft 365 admin center

Home > Active users

Active users

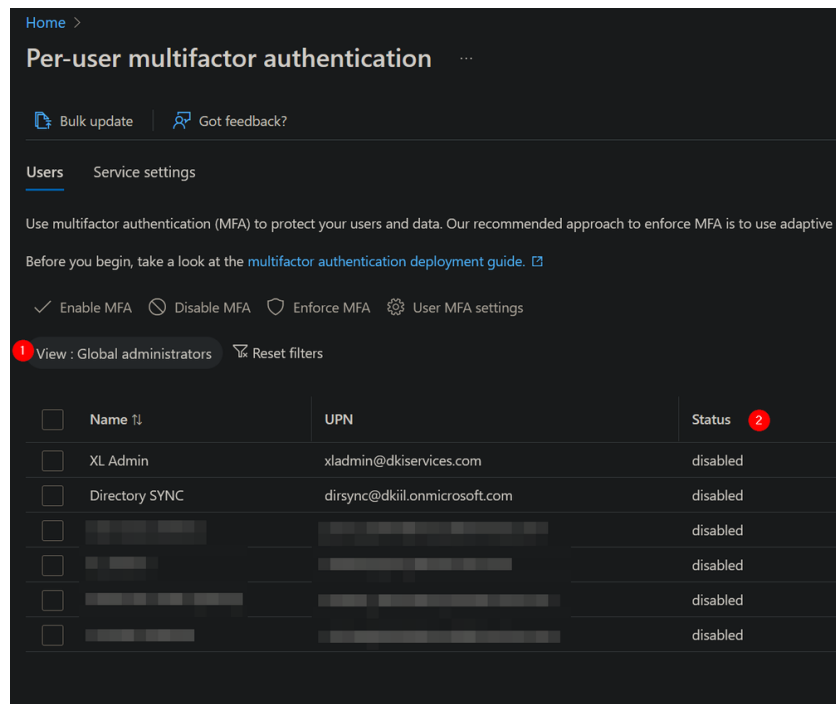

1

2

Display name ↑ Username

☐	[Redacted]	:	[Redacted]
☐	[Redacted]	:	[Redacted]
☐	[Redacted]	:	[Redacted]
☐	[Redacted]	:	[Redacted]
☐	[Redacted]	:	[Redacted]

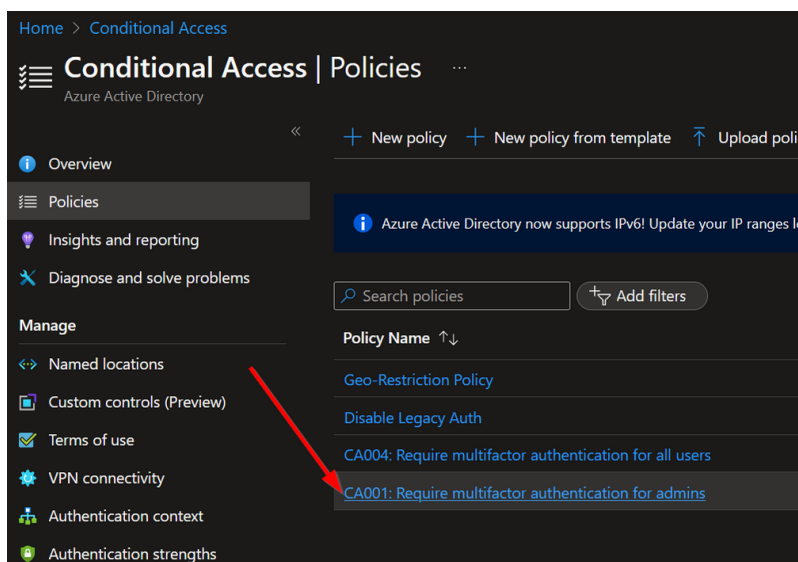

- Select the Global Administrators view
- If all accounts are **Enforced**, then it is aligned. If it is disabled or enabled, it is not aligned.

3 Conditional Access

- In the Azure Portal, view [Conditional Access Policies](#)
- Typically it will be shown like the policy below

- Open the policy and verify the Global Administrator role is selected

CA001: Require multifactor authentication for admins

Conditional Access policy

Delete View policy information

Control access based on Conditional Access policy to bring signals together, to make decisions, and enforce organizational policies. [Learn more](#)

Grant ⓘ
1 control selected

Session ⓘ
0 controls selected

Include Exclude

☐ None

☐ All users

☒ Select users and groups

☐ Guest or external users ⓘ

☒ Directory roles ⓘ

14 selected

☐ External ID user flow administrator

☐ External ID user flow attribute administrator

☐ External Identity Provider administrator

☒ Global administrator 2

☐ Global reader

☐ Groups administrator

☐ Guest inviter

- Check the 'Exclude' section for any exceptions and raise them with the POC accordingly if they are unknown exceptions. Microsoft recommends at least 1 global admin account be excluded from this policy to prevent locking yourself out of the system.
