

Licensed Users Review

Generated at — July 20, 2026, 1:54 p.m.

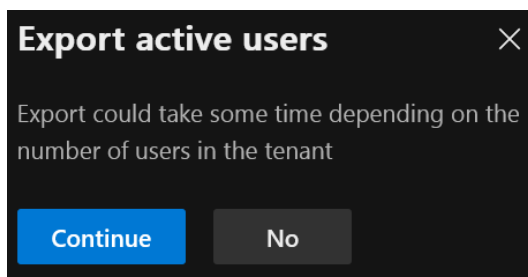

The goal of this audit is to identify accounts that have sign-in blocked but are still licensed. There are a few possible explanations of how this can happen.

- POC didn't enter a termination ticket
- The termination SP step to remove the license wasn't followed

1 Untitled Step

- Go to [Active Users](#) and Export Users, Continue

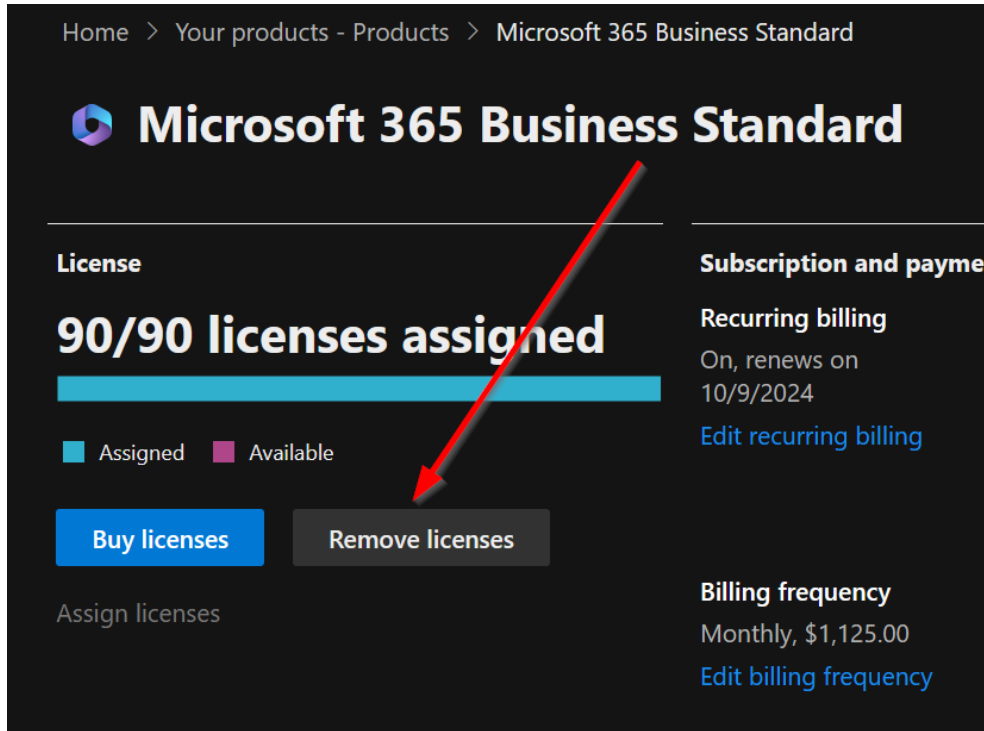

- Open the CSV and delete all columns except for:
 - **Blocked credential**
 - **Display name**
 - **Licenses**
 - **User principal name**
- Format however you desire, but add filters so you can filter out the following:
 - Block credential: TRUE (filter out)
 - Licenses: (Blanks)

Block credential	Display name	Licenses	User principal name
TRUE	Chad Gockman	Microsoft 365 Business Standard	chad_g@driv-lok.com
TRUE	Mike McClure	Microsoft 365 Business Standard	mike_m@driv-lok.com
TRUE	purchasing	Microsoft 365 Business Standard	purchasing@driv-lok.com
TRUE	rfq	Microsoft 365 Business Standard	rfq@driv-lok.com
TRUE	Ryan Ericson	Microsoft 365 Business Standard	ryan_e@driv-lok.com
TRUE	Veeam	Microsoft 365 Business Standard	veeam@driv-lok.com
TRUE	webmaster	Microsoft 365 Business Standard	webmaster@driv-lok.com

- Review AT to locate termination tickets, ask the POC if you can't find any information.
- If they are service accounts or shared mailboxes, consider talking to the mailbox owners or POC about if they can be used as shared mailboxes, which don't require licenses.

- Once all of the licenses are cleaned up, if they are purchasing their licensing directly from Microsoft, [you can reduce their license counts](#) down to only what is needed, otherwise they will not save any money and still be paying Microsoft for unused licenses.
