

Trusted Locations Review

Generated at — July 20, 2026, 1:55 p.m.

Here's a quick way to check your organization's trusted IPs or ranges and make sure they're not bypassing security

1 Untitled Step

1. Sign in to the [Microsoft Entra admin center](#)
2. Under **Named locations**, review each **IP range** or **location** that's marked as trusted.
3. Confirm that no unapproved IP addresses or ranges are listed and linked to policies.
4. If an entry shouldn't bypass MFA or other controls, **unmark it as a trusted location** or remove it from the list after confirming through tickets and checking with the POC.

This ensures no IP addresses are quietly exempt from your standard security policies.

Microsoft Entra admin center

Home > Conditional Access

Conditional Access | Named locations

Named locations are used by Microsoft Entra security reports to reduce false positives and by Microsoft Entra Conditional Access policies. Named Locations that are marked Trusted or configured in Conditional Access Policies cannot be deleted. [Learn more](#)
